www.DeVilbissHealthcare.com

Since 1888

Based on customer input, DeVilbiss Healthcare is pleased to announce the Nasal-Aire II Frame System is now available. The system contains only the tubing and cannula - no headgear.

Previously, customers were required to purchase a complete Nasal-Aire II kit to obtain the tubing.

The new Frame Kit is available in six sizes, which correspond to the Nasal-Aire II set-up kits. Please refer to the table below for part numbers and descriptions.

The Nasal-Aire II Frame System meets the requirement for HCPCS code A7034, which is available for replacement once every three months.

For more information on the Nasal-Aire II cannula interface please visit our website.
