

You decide when to fill and when to go

iFill makes it easy and convenient for you to fill portable oxygen cylinders right in your home to give you greater freedom to come and go on your terms.

- iFill gives you the flexibility to fill a wide range of cylinders from the M4 and M6, popular for traveling, to back-up E cylinders.
- Select a cylinder size that best suits your out-of-home experience. For example, lightweight M6 cylinders provide up to 4 hours of portable oxygen, giving you the option to leave home without an oxygen cart. An M6 cylinder, and others, can be comfortably carried by shoulder strap or around the waist.
- All cylinders can be refilled as often as you need.

Specifications (continued)

Oxygen Duration

NOTE-All ambulatory ranges are calculated assuming a breath rate of 20 BPM in PulseDose mode.

Flow Rate:	Use Times (Shown In Hours)							
	1	1.5	2	2.5	3	4	5	6
M4								
PulseDose	5.7	3.8	2.9	2.3	1.9	1.4	1.1	.9
Continuous Flow	1.9	1.3	.9	.7	.6	.5	.4	.3
M6								
PulseDose	8.3	5.5	4.1	3.3	2.8	2.1	1.7	1.4
Continuous Flow	2.7	1.8	1.4	1.1	.9	.7	.6	.4
ML6								
PulseDose	8.6	5.7	4.3	3.4	2.9	2.1	1.7	1.4
Continuous Flow	2.8	1.9	1.4	1.1	.9	.7	.6	.5
C								
PulseDose	12.1	8.1	6.1	4.9	4.0	3.0	2.4	2.0
Continuous Flow	4.0	2.7	2.0	1.6	1.3	1.0	.8	.7
D								
PulseDose	21.0	14.0	10.5	8.4	7.0	5.2	4.2	3.5

iFill™

Don't wait while life is passing you by

Oxygen patients like you can now enjoy greater independence to leave home on the spur of the moment thanks to the innovative iFill Personal Oxygen Station from DeVilbiss. You'll never be dependent on home cylinder delivery schedules or fear running out of oxygen again – two big reasons why you may have been reluctant to leave home.

Personal Oxygen Station

Choice of cylinders

- **DeVilbiss PD1000A PulseDose® Oxygen Conserving Cylinder** is widely recognized as the gold standard of conserving technology, offering true 3.5:1 savings. The PD1000A is designed to minimize discomfort associated with oxygen therapy. Patients report decreased drying and irritation of the nose.
- Quickly delivers a 16.5 ml bolus of oxygen (per liter setting) deep into your lungs. The volume of oxygen is consistent regardless of your breathing rate, eliminating the need to adjust settings during exertion.
- Intuitive click-stop prescription control knob lets you easily choose among eight common prescription settings.
- Rugged, impact-resistant GE LEXAN® case.
- Single lumen cannula
- Two standard AA alkaline or NIMH batteries provide approximately 50 days of operation (2 lpm prescription setting; 20 bpm, 4 hours/day) Continuous flow mode requires no batteries.
- **870 Post Valve**
- Allows you to use most manufacturers' oxygen conserving devices.
- **Standard Regulator**
- Pneumatic continuous flow regulator
- Provides .5 – 6 lpm continuous flow
- Single lumen cannula
- Brass fittings

LEXAN is a registered trademark of General Electric Company.

Specifications

DeVilbiss iFill Personal Oxygen Station

Output	93% O ₂ ± 3%
Width	12.25 inches
Height	28.5 inches
Depth	22.5 inches
Weight	66 lbs.
Warranty	3 years or 8000 hours — whichever comes first

Cylinder Fill Times

NOTE-All filling times are approximate and may vary depending on environmental conditions, such as altitude. Typical cylinder fill time to 2,000 ± 100 psig are as follows:

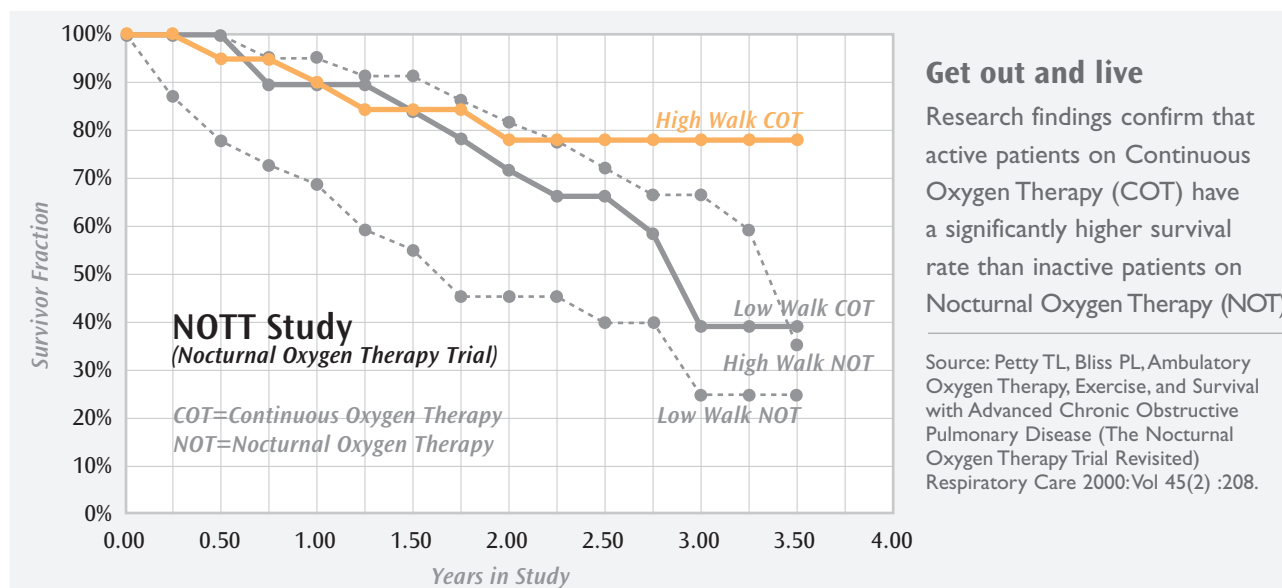

M4	60 minutes
M6	75 minutes
ML6	90 minutes
C	130 minutes
D	215 minutes
E	350 minutes

iFill puts you in control

The DeVilbiss iFill Personal Oxygen Station represents the latest in portable oxygen convenience, providing unmatched flexibility and ease of use. The iFill unit extracts purified oxygen from room air using standard oxygen concentrator technology.*

- iFill can be placed and used virtually anywhere in the home—minimizing the noise and disruption to daily life.

- Existing oxygen patient? Don't worry—iFill can be used with any manufacturer's concentrator...even yours.
- Connectors on the cylinder and iFill unit simply click into place. Control panel lights indicate when the cylinder is filling and when the cylinder is full.
- An M6 iFill cylinder can be filled in just a little over an hour — not the two hours it can take with other in-home oxygen filling units. Shorter fill times save energy costs.

Get out and live

Research findings confirm that active patients on Continuous Oxygen Therapy (COT) have a significantly higher survival rate than inactive patients on Nocturnal Oxygen Therapy (NOT).
